ROHIT SHARMA

Android Engineer | Kotlin, Jetpack Compose & React Native

Mumbai, India | +91 7972401335 | work.rohit531@gmail.com | LinkedIn | GitHub | LeetCode

PROFESSIONAL SUMMARY

Android Engineer with 5+ years of experience building consumer- and customer-facing Android apps in Kotlin, Java, and Jetpack Compose, with React Native experience, shipped to Google Play and deployed across 1,000+ hospitality venues. Experience with real-time communication (audio/video calls, WebSocket live updates), REST APIs and third-party integrations, and AI-assisted development with Claude Code. Owns features end to end, from technical design to release.

TECHNICAL SKILLS

Android: Kotlin, Java, Android SDK, Jetpack Compose, Coroutines, Flow, RxJava, RxKotlin, Room, MVVM, MVI, Clean Architecture, Dagger/Hilt, Koin, Ktor

Communication & APIs: REST/GraphQL, WebSocket, real-time audio/video calls, third-party and payment SDK integrations, Firebase

Cross-platform & Web: React Native, Kotlin Multiplatform (KMP), JavaScript, Node.js, Express

Testing & Delivery: JUnit, Mockito, Espresso, Robolectric, Git, Android Studio, Gradle, CI/CD, Fastlane, Play Store releases, Linux (personal dev environment)

AI-Assisted Development: Claude Code (CLI workflows, guardrails, hooks, code indexing, MCP connectors)

Native & Security: C (JNI), NDK, Android services, Keystore, PKI, TLS, OAuth, SAML (working knowledge), secure IPC, Intune MDM, Jamf

PROFESSIONAL EXPERIENCE

Software Engineer | Forcepoint[Nov 2025 – Present]
Mumbai (Hybrid)

- Built a corporate VPN Android app from the ground up, shaping client architecture for enterprise security and reliability.
- Integrated a C-based EasyConnect proxy via JNI/NDK and debugged native-layer issues across the JNI boundary to stabilize the tunnel.
- Implemented VPN lifecycle handling (reconnection across network changes and service restarts) and Always-on VPN support for managed devices.
- Applied Android security practices (Keystore, certificate/PKI handling, cryptography, secure IPC) and managed enterprise rollout through Intune MDM, Jamf, and Managed Google Play.
- Participate in code reviews as part of an individual-contributor engineering team.
- Built a Claude Code workflow for the Android and iOS repositories: code indexes to cut token usage versus grep-based search, guardrails and hooks, cache-dump and memory scripts, and MCP connectors.

Sr. Software Engineer | Kayana: Ordering and Payment Solutions[Sept 2024 – Nov 2025]
Mumbai (Hybrid)

- Led Android development across Kayana's core POS suite (EPOS, MPOS, terminal apps, and customer-facing Kiosk/SSK self-service apps) used across 1,000+ hospitality venues.
- Built a region- and device-aware tap-to-pay SDK that dynamically selects the optimal payment method based on hardware, region, and payment type, with offline functionality.
- Designed a native (NDK) interface for the SDK and receipt-printer integration with POS hardware, improving performance and reliability.
- Built an in-house MDM solution for app management, updates, and enterprise provisioning across SSK, EPOS, and MPOS devices.
- Acted as team lead for a 5-member team, reviewing code and mentoring teammates.
- Contributed to the fraud-detection and AI-assistant projects listed below.

Founding Full Stack Mobile Engineer | Flavum Healthtech Pvt Ltd[Oct 2023 – Sept 2024]
Remote

- Joined as a founding engineer and led cross-platform development with Kotlin Multiplatform (KMP), owning 70%+ of the codebase.
- Owned app builds and deployments end to end, and reviewed code and mentored teammates.
- Integrated real-time audio/video calls into the app.
- Integrated secure payments.
- Built WebSocket-based live updates for real-time app state.
- Enabled dynamic UI rendering with server-driven content and remote configuration.
- Deployed backend services on AWS (EC2, S3), improving reliability and scalability.

Android Engineer | Cognitive Clouds Pvt Ltd[Jun 2022 – Oct 2023]
Bengaluru (Remote)

- Led 4 Android projects, collaborating with design, QA, and backend teams for on-time delivery and successful Play Store releases.
- Built a screen-casting and media app that projects the phone screen to a TV and streams videos and files over Wi-Fi using ExoPlayer; developed both the Android and TV apps.
- Applied advanced concurrency, offline support, and threading for responsive UI; achieved 60% unit test coverage with JUnit and Mockito.

SELECTED PROJECTS

Adeyt ChatBot (Kayana) — *Spring Boot, OpenAI API, Confluence KB, MCP, Compose*

- Contributed to an AI assistant resolving client and CSR queries via the OpenAI API and the company knowledge base.
- Supported real-time chat through Spring Boot APIs and WebSocket integration.

Fraud Detection Engine (Kayana) — *Python, Keras, scikit-learn, Spring Boot*

- Contributed to a real-time fraud detection model and integrated it into Spring Boot microservices for instant transaction scoring.

iplprediction2026.in (personal project) — *Vercel, SEO*

- Run a consumer cricket-prediction website, owning the product, hosting, and domain setup on Vercel, plus SEO strategy for time-sensitive match queries (structured data, crawl strategy).

EDUCATION

Bachelors in Computer Science — Mumbai University, 9.44 CGPA
JCHNE + Cloud V1 — Jetking, Grade A

HONOURS & AWARDS

- 1st Rank District-wide in Maha IT Genius (2017), MKCL; 1st Rank in Department and College for academic excellence.
